I would like to comment on the availability of satellite radio services that I currently purchase from XM Radio. I reside in North carolina and I travel to the Washington Metro area weekly. The XM Instant Traffic and weather information that I subscribe to on XM Radio is most valuable to me. I am able to get early information about traffic conditions in the Washington Metro area, instantly, well before I get within range of broadcast stations. This allows me to plan my travel according to the known traffic and weather conditions of the DC area. This service is most valuable to me and I wish to continue purchasing this service.
